Spring/Summer 2012 Training!

INTERACTIVE READING & NOTETAKING is a **POWERFUL** process that combines and aligns research, standards, content, assessment, and strategies. Interactive Reading & Notetaking *shows students how to learn*. Attend a training session and learn the **WHYs** and **HOWs** behind each of the strategies as you create your own interactive notebook!

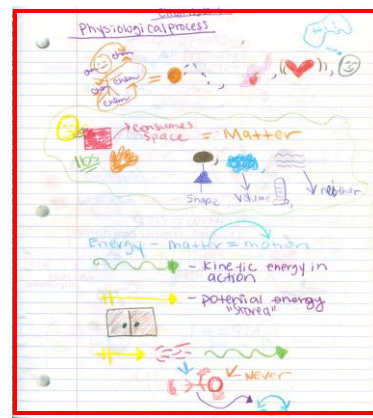

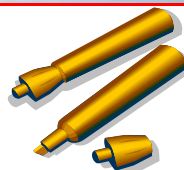

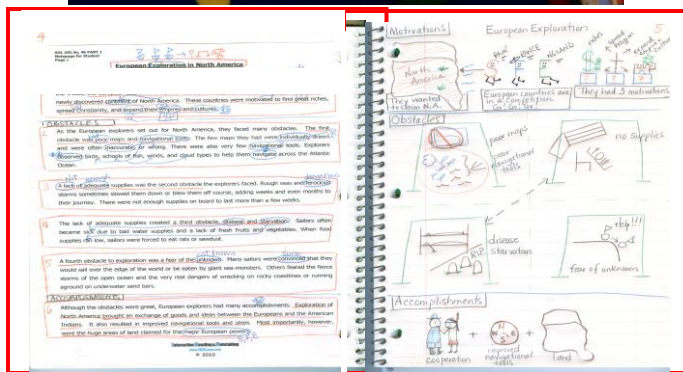

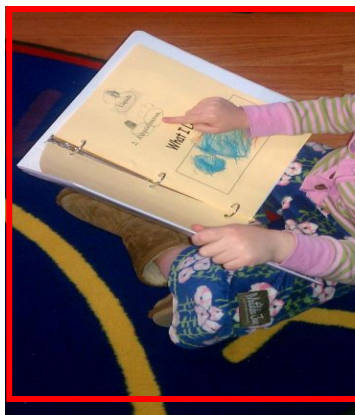

However . . . it's so much more than a notebook! We will show you how Cambourne's Model of Learning, Marzano's 9 instructional strategies, the best reading strategies, brain research, and a whole lot of metacognition is supported on every single page of our interactive notebook. Get ready for your students to become independent learners, readers, and thinkers!

Setting the stage in Pre-K and moving through **all grade levels** and **all subject areas**, you will see how Interactive Reading & Notetaking provides **consistency** in teaching **AND** learning. Students learn *how to learn* because the rules for learning are consistent year after year, bell after bell!

Based on 37 years of combined experience as teacher, reading specialist, instructional specialist, administrator, adjunct professor, and teacher as researcher, we're on a mission to revolutionize teaching **AND** learning!

Join us!

Interactive Reading & Notetaking is a Framework for Teaching **AND** Learning . . .
PRESCHOOL TO COLLEGE!
